Breedon announces their first ratings for CDP submission

CDP ratings demonstrate commitment to environmental transparency

Breedon Group plc (Breedon or the Group), a leading vertically-integrated construction materials group in Great Britain and Ireland, is proud to announce its commendable performance in its inaugural submission to the Carbon Disclosure Project (CDP), a global nonprofit that runs the world's leading environmental disclosure platform. The Group achieved a 'B' rating for Climate Change disclosure and a 'C' rating for Water Security disclosure, reflecting its commitment to environmental transparency and sustainable practices.

The CDP is a global non-profit that runs the world's environmental disclosure system for companies, cities, states, and regions. Achieving a 'B' rating for Climate Change disclosure places Breedon in the 'Management' band, signifying that the Group is addressing the environmental impacts of their business and ensuring good environmental management, whilst taking coordinated action on climate issues. The 'C' rating for Water Security disclosure indicates that Breedon is taking initial steps to manage water resources sustainably, which is critical in the aggregates industry.

With a record 23,000+ companies disclosing through CDP in 2023, disclosing data on environmental impact is now a business norm. Breedon's data will be added to the most comprehensive inventory of self-reported environmental data in the world – helping to drive action through greater transparency. By disclosing through CDP, Breedon is prepared to respond to the increasing demand for environmental transparency from financial institutions, customers and policymakers.

Donna Hunt, Head of Sustainability at Breedon Group, commented,

"We are thrilled with the results of our first CDP submission. Our 'B' rating for Climate Change disclosure is a clear indication of our strategic approach to managing carbon and our commitment to reducing our environmental impact. The 'C' rating for Water Security disclosure is also a significant achievement, as it recognises the steps we are taking towards water stewardship. These ratings are a testament to the hard work and dedication of our team, and they reinforce our resolve to continue integrating sustainability into every aspect of our operations."

The CDP's annual environmental disclosure and scoring process is widely recognised as the gold standard of corporate environmental transparency. Breedon's strong performance in its first submission is a milestone in its sustainability journey and sets a solid foundation for continuous improvement.

Breedon remains dedicated to enhancing its sustainability performance and is already implementing strategies to improve its CDP ratings in the future. The Group is committed to ongoing investment in sustainable technologies, responsible sourcing, and community engagement, to ensure a positive impact on the environment and society.

Breedon Group plc

Breedon Group plc, a leading vertically-integrated construction materials group in Great Britain and Ireland, delivers essential products to the construction sector. Breedon holds 1bn tonnes of mineral reserves and resources with long reserve life, supplying value-added products and services, including specialty materials, surfacing and highway maintenance operations, to a broad range of customers through its extensive local network of quarries, ready-mixed concrete and asphalt plants.

The Group's two well-invested cement plants are actively engaged in a number of carbon reduction practices, which include utilising alternative raw materials and lower carbon fuels. Breedon's 3,800 colleagues embody our commitment to 'Make a Material Difference' as the Group continues to execute its strategy to create sustainable value for all stakeholders, delivering growth through organic improvement and acquisition in the heavyside construction materials market.

About CDP

CDP is a global non-profit that runs the world's environmental disclosure system for companies, cities, states and regions. Founded in 2000 and working with more than 740 financial institutions with over \$137 trillion in assets, CDP pioneered using capital markets and corporate procurement to motivate companies to disclose their environmental impacts, and to reduce greenhouse gas emissions, safeguard water resources and protect forests. Over 25,000 organizations around the world disclosed data through CDP in 2023, with more than 23,000 companies – including listed companies worth two thirds global market capitalization - and over 1,100 cities, states and regions.

Fully TCFD aligned, CDP holds the largest environmental database in the world, and CDP scores are widely used to drive investment and procurement decisions towards a zero carbon, sustainable and resilient economy. CDP is a founding member of the Science Based Targets initiative, We Mean Business Coalition, The Investor Agenda and the Net Zero Asset Managers initiative.
