

BREEDON SURFACING SOLUTIONS

**EXPERT SURFACING BY THE UK'S LARGEST
INDEPENDENT CONSTRUCTION MATERIALS GROUP**

www.breedongroup.com

BREEDON'S SURFACING & CONTRACTING BUSINESS IS CENTRED ON NINE REGIONAL HUBS, OFFERING A FULL SERVICE ACROSS THE CENTRAL BELT OF ENGLAND AND THROUGHOUT SCOTLAND.

We operate around 60 quarries and 30 asphalt plants in the UK and our surfacing business has grown and developed around these strategically located units. This enables us to provide a fast and responsive local service to our customers, backed up by security of supply and the reassurance of excellent quality materials.

OFFERING SPECIALIST ASPHALT SURFACING SOLUTIONS

We provide comprehensive asphalt surfacing solutions for a range of applications, from planned projects through to reactive maintenance. We offer everything from a highly responsive turnkey preparation and laying service using our specialist range of proprietary asphalt products, to day-to-day highway maintenance where required:

- Highway maintenance – major and minor
- Commercial, retail and residential developments
- Brownfield and greenfield Sites
- HGV asphalt surfacing
- Industrial asphalt surfacing
- Car parks and forecourts
- Racetracks and airfields
- Agricultural asphalt surfacing, including anaerobic digesters
- Trench and patch reinstatements
- Footpaths and driveways

WORKING WITH SPECIFIERS, LOCAL AUTHORITIES, BUILDING CONTRACTORS AND THE GENERAL PUBLIC

Our clients range from domestic customers and local businesses to large contractors, trunk road managers and local authorities. They come to us because we specialise in surfacing and resurfacing a wide range of environments, applications and project sizes. Whether you're looking for specialist industrial asphalt surfacing or small-scale domestic work, our expertise and helpful attitude will ensure you get the right solution at the best value.

Working with you begins with a no-obligation call to discuss your specific project challenges and individual requirements.

USING TOP-QUALITY MATERIAL FROM STATE-OF-THE-ART PLANTS

Our asphalt contracting services are quality-assured to National Highways Sector Scheme 16 – for the laying of asphalt mixes; BS 594987; and the Specification for Highway Works. Materials supplied are ISO 9001 quality-certified in accordance with National Highways Sector Scheme 14 – for the Quality Management of the production of asphalt mixes, and comply fully with the relevant sections of BS EN 13108 (the European standard that replaced British Standards BS 4987 and BS 594). We also produce a wide range of proprietary asphalts for specialist uses which have demonstrated better performance when compared with standard materials.

BREEDON Agricultural HRA*: for silo floors, silage clamps, animal house floors and areas requiring acid resistance

BREEDON Cititex: for major routes, urban areas, high-stress regions, car parks and drive-throughs

BREEDON Driveway: for new-build housing estates, driveways, light traffic accesses, parking zones, hand-lay work and hard-play areas

BREEDON Enriched: for parking areas, driveways, farm roads, footpaths, cycle paths and housing development roads

BREEDON Fibre: for trunk roads, car parks and major routes

BREEDON Fibretex: for major routes, urban areas, high-stress locations and car parks

BREEDON Flex: for urban and rural locations; concrete overlays; and heavily-trafficked sites and roundabouts

BREEDON Flex SAMI: for concrete overlays and Cement Bound Granular Materials (CBGM), bridge decks, heavily-trafficked sites and roundabouts and cracked pavements

BREEDON Industrial HRA & SMA: for bus depots, lorry parks, loading and stocking areas (where fork lifts are in use) and fuelling zones

BREEDON Lower Temperature Asphalt: for all applications

BREEDON OneCoat: for farm and other roads, car parks and housing developments

BREEDON OneCoat Footway: for footpaths, cycle paths and bridleways

BREEDON Polymer Plus: for major routes, urban areas, high-stress regions, problematic sites (e.g. with poor drainage) and car parks

BREEDON Polytex: for major routes, urban areas, high-stress locations, car parks and problematic sites (e.g. sea fronts)

BREEDON Porous: for playgrounds, car parks, driveways, difficult drainage areas and lightly-trafficked roads

BREEDON Track: for motor-racing circuits, airfields and storage areas

** Available in certain areas only*

DELIVERED ON TIME, ON BUDGET

Our approach is simple. We are committed to sharing best practice across our business, so that wherever you engage with us you will receive the same outstanding quality and attention. We aim not just to deliver a service, but to surpass our customers' expectations.

We encourage Early Contractor Involvement (ECI) to ensure innovative, value-for-money and low-risk engineering solutions.

Our highly-skilled team are qualified to the industry standard as a minimum and are supported by equally experienced Health & Safety, Technical, Research & Development (R&D) and Administrative teams, with a strong commitment to recycling and sustainability. Our quality control and R&D facilities are UKAS accredited, ensuring the highest standards are maintained.
