

## INDEPENDENT ASSURANCE REPORT

**To: The Stakeholders of Breedon Group Plc**

### 1. Introduction and Objectives of Work

Bureau Veritas UK Ltd ('Bureau Veritas') has been engaged by Breedon Group Plc ('Breedon') to provide limited assurance of selected quantitative data contained within the Breedon Group Annual Report and Accounts 2024 ('the Report'). The objective is to provide assurance to Breedon and its stakeholders over the accuracy and reliability of the reported information and data.

### 2. Scope of Work

The scope of our work was limited to assurance over the following information included in the Report and under Breedon's operational control, for the reporting period 1<sup>st</sup> January – 31<sup>st</sup> December 2024 (the 'Selected Information'):

- GHG Emissions (tCO<sub>2e</sub>)
  - Scope 1 GHG Process Emissions
  - Scope 1 GHG Non-Process Emissions
  - Scope 1 Total GHG Emissions
  - Scope 2 GHG Emissions location-based
  - Scope 3 GHG emissions - Category 1 Purchased Goods and Services (emissions from purchased cement and clinker only)
- Energy Consumption (MWh)
  - On-site combustion
  - Electricity
  - Road transport
  - Total energy consumption
- Health and Safety
  - Employees and contractor Total Lost Time Injury Frequency Rate (LTIFR)
- % Revenue from Sustainable Concrete and Asphalt Products

### 3. Reporting Criteria

The Selected Information needs to be read and understood together with Breedon's reporting methodology as set out at in the 'Breedon Sustainability data Basis of Reporting', available on Breedon's website [here](#).

### 4. Limitations and Exclusions

Excluded from the scope of our work is assurance of information relating to:

- Activities outside the defined assurance period;
- Positional statements of a descriptive or interpretative nature, or of opinion, belief, aspiration or commitment to undertake future actions; and
- Other information included in the Report other than the Selected Information.

The following limitations should be noted:

- This limited assurance engagement relies on a risk-based selected sample of sustainability data and the associated limitations that this entails.
- The reliability of the reported data is dependent on the accuracy of metering and other production measurement arrangements employed at site level, not addressed as part of this assurance.
- This independent statement should not be relied upon to detect all errors, omissions or misstatements that may exist.
- With respect to the % Revenue from Sustainable Concrete and Asphalt Products, the procedures did not include verification of financial data (revenue) which is audited separately by an external financial auditor for the reporting year. The product lifecycle scope of the assessment was cradle-to-gate (consistent with the claim).

### 5. Responsibilities

This preparation and presentation of the Selected Information in the Report are the sole responsibility of the management of Breedon.

Bureau Veritas was not involved in the drafting of the Report or of the Reporting Criteria. Our responsibilities were to:

- obtain limited assurance about whether the Selected Information has been prepared in accordance with the Reporting Criteria;
- form an independent conclusion based on the assurance procedures performed and evidence obtained; and
- report our conclusions to the Directors of Breedon.

### 6. Assessment Standard

We performed our work to a limited level of assurance in accordance with the *International Standard on Assurance Engagements (ISAE) 3000 Revised, Assurance Engagements Other than Audits or Reviews of Historical Financial Information (effective for assurance reports dated on or after December 15, 2015)*, issued by the International Auditing and Assurance Standards Board.

## 7. Summary of Work Performed

As part of our independent assurance, our work included:

1. Conducting interviews with relevant personnel of Breedon at Head Office level;
2. Conducting interviews with external Consultants with responsibility on the data reporting;
3. Conducting remote site audits to the following 8 sites:
  - Hope Works
  - Cloud Hill Quarry
  - Defiance (22)
  - Dowlow Quarry
  - Dublin Asphalt plant
  - Raisby Quarry
  - Temple
  - Wickwar Quarry & Landfill
4. Reviewing the data collection and consolidation processes used to compile Selected Information, including assessing assumptions made, and the data scope and reporting boundaries;
5. Reviewing documentary evidence provided by Breedon;
6. Agreeing a selection of the Selected Information to the corresponding source documentation;
7. Reperforming greenhouse gas emissions conversions calculations; and
8. Reviewing Breedon's systems for quantitative data aggregation.

A 5% materiality threshold was applied to this assurance. It should be noted that the procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

## 8. Conclusion

On the basis of our methodology and the activities and limitations described above nothing has come to our attention to indicate that the Selected Information is not fairly stated in all material respects.

However, it should be noted that for the Scope 3 – Category 1 reporting, one of the sampled supplier's emission factors is in terms of CO<sub>2</sub> not CO<sub>2</sub>e as the CO<sub>2</sub>e factors were not available.

<b>KPIs in scope - 1<sup>st</sup> January to 31<sup>st</sup> December 2024</b>	<b>2024 verified</b>	<b>Unit</b>
Scope 1 GHG emissions - Process emissions (Cement)	923,957	tCO <sub>2</sub> e
Scope 1 GHG Non-Process Emissions	627,575	tCO <sub>2</sub> e
Scope 1 GHG Total emissions	1,551,532	tCO <sub>2</sub> e
Scope 2 GHG emissions – Location-based	73,969	tCO <sub>2</sub> e
Total Scope1 and 2 GHG emissions	1,625,501	tCO <sub>2</sub> e

<b>KPIs in scope - 1<sup>st</sup> January to 31<sup>st</sup> December 2024 (cont.)</b>	<b>2024 verified</b>	<b>Unit</b>
Scope 3 GHG emissions - Category 1 Purchased Goods and Services - emissions from purchased cement and clinker only	338,140	tCO <sub>2</sub> e
Energy - On-site combustion	2,352,729	MWh
Energy - Electricity	324,120	MWh
Energy - Road Transport	109,554	MWh
<b>Total Energy Consumption</b>	<b>2,786,403</b>	<b>MWh</b>
Sustainable Products - % Revenue from Sustainable Concrete and Asphalt Products	48%	%
Health and Safety - Total Lost Time Injury Frequency Rate (LTIFR) (employees & contractors)	3.30	N/A

## 9. Statement of Independence, Integrity and Competence

Bureau Veritas is an independent professional services company that specialises in quality, environmental, health, safety and social accountability with over 190 years history. Its assurance team has extensive experience in conducting verification over environmental, social, ethical and health and safety information, systems and processes.

Bureau Veritas operates a certified<sup>1</sup> Quality Management System which complies with the requirements of ISO 9001:2015, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards, quality reviews and applicable legal and regulatory requirements which we consider to be equivalent to ISQM 1 & 2<sup>2</sup>.

Bureau Veritas has implemented and applies a Code of Ethics, which meets the requirements of the International Federation of Inspections Agencies (IFIA)<sup>3</sup>, across the business to ensure that its employees maintain integrity, objectivity, professional competence and due care, confidentiality, professional behaviour and high ethical standards in their day-to-day business activities. We consider this to be equivalent to the requirements of the IESBA code<sup>4</sup>. The assurance team for this work does not have any involvement in any other Bureau Veritas projects with Breedon.
